TECH TOOL BOX

- Languages - HTML5, JavaScript, Angular 2, MySQL, PHP and PHPUnit, CSS3, Bootstrap, GitHub, jQuery.
- Operating systems - Windows 7 Mac ox
- Soft-Ware- Google Chrome, Github, Microsoft Office, YouTube
- Trouble Shooting Mainly for friends and family usually on a pc

EDUCATION

My most resent time in school was at Deep Dive Coding Bootcamp at this boot camp I learned most of my coding skills. It was during my Time there that I learned what it takes to work on a dev team.

I was homeschooled during high school by my grandmother who was a teacher for 40+ years where we stayed with the Local schools curriculum.

STRENGTHS

- Teamwork
  Weather it was being on a team in the boy scouts or working at Hinkle Family Fun Center I find my best work is working with other people. Being on a team means to me putting in huge amounts of effort so I don't let all of my team mates down.
- Strategic Thinking
  Being able to step back and think through a problem is one of the most satisfying things to me

EXPERIENCE

All of my experience is coming from my 10 week 40+ hour coding boot camp

Im currently working on a web app called Cannaduceus which is a web app that is for medical marijuana patients. One of its main features is that it will show you dispensary's near you. Your able to leave reviews for dispensary's and strains. We still have a lot to do but I have no doubt we will get through it.

Next up is my personal website its made with bootstrap right now its pretty basic but its really coming together
